Scribble Clash

Version 1.0 | Multiplayer Drawing & Guessing Game

1. Project Overview

Scribble Clash is a browser-based multiplayer drawing and guessing game where players take turns drawing a secret word while other players attempt to guess it through a chat interface. The game focuses on real-time interaction, simple visuals, and an accessible user experience that can be played directly in a web browser.

The objective of this prototype is to create a functional multiplayer experience featuring shared drawing, word guessing, score tracking, and turn-based gameplay. The visual design should remain clean, modern, and easy to understand while prioritizing usability over complex artwork.

2. Visual Direction

The game should follow a clean and modern casual gaming style.

Design Goals

- Easy-to-understand interface
- Bright and welcoming appearance
- Minimal visual clutter
- Responsive layout for desktop browsers
- Clear separation between drawing, chat, and scoring areas
- Fast and intuitive gameplay experience

Reference Inspiration

- Skribbl.io
- Gartic.io
- Drawize

These references are for gameplay inspiration only. The final implementation must contain original assets and UI elements.

3. Color Palette

Usage	Color	Hex Code
Primary	Blue	#3B82F6
Secondary	Purple	#8B5CF6
Success	Green	#22C55E
Warning	Orange	#F97316
Background	Light Gray	#F8F AFC
Text	Dark Gray	#1F2937
Canvas Border	Gray	#CBD5E1

4. Typography

Usage	Font
Headings	Poppins Bold
Body Text	Inter Regular
Fallback Fonts	Arial, Sans-serif

Typography should prioritize readability and accessibility.

5. Core Gameplay Assets

The game must include the following gameplay assets and interface components:

- Multiplayer lobby
 - Room creation functionality
 - Room joining functionality
 - Shared drawing canvas
 - Brush drawing tool
 - Color selection controls
 - Guess chat interface
 - Round timer
 - Player list
 - Scoreboard
 - Word selection interface
 - Game-over screen
 - Final ranking display
-

6. Layout Reference

Top Section

Contains:

- Room code
- Round information
- Current turn information
- Countdown timer

Center Section

Contains:

- Shared drawing canvas

Right Section

Contains:

- Player list
- Scoreboard

Bottom Section

Contains:

- Guess input field
- Guess submission button
- Guess history panel

The layout should remain usable across common desktop screen resolutions.

7. Deliverables

The freelancer must deliver the following assets and functionality as part of the playable prototype.

Deliverable	Description
Lobby Screen	Screen allowing players to create or join a room
Game Screen	Main gameplay screen
Drawing Canvas	Shared multiplayer drawing area
Player List	List of connected players
Scoreboard	Real-time score tracking

Deliverable	Description
Chat Panel	Guess submission interface
Round Timer	Countdown timer for active rounds
Word Selection Interface	Word selection for active drawer
Game Over Screen	Final rankings after all rounds
Responsive Layout	Functional on common desktop resolutions
README File	Installation and execution instructions
Source Code	Complete project source code

All deliverables must be functional and integrated into a single playable browser-based application.

8. Placeholder Assets

The following placeholder assets may be used:

- Text-based game logo
- Basic player avatars
- Default brush icon
- Default eraser icon
- Simple game-over illustration
- Basic UI icons

Custom artwork and premium asset packs are not required for this prototype.

9. Acceptance Criteria

Criteria	Requirement
Color Palette	UI follows specified palette
Typography	Required fonts or suitable fallback fonts used
Drawing Canvas	Canvas visible and fully functional
Chat Interface	Players can submit guesses
Scoreboard	Scores update correctly
Timer	Round timer visible and operational
Multiplayer	Multiple players can participate in the same room
Layout	Interface remains usable on desktop resolutions
Gameplay Flow	Turns rotate correctly between players

Criteria	Requirement
Visual Consistency	Consistent styling across all screens

10. Scope Boundaries

The following items are explicitly out of scope:

- Voice chat
- Video chat
- User account systems
- Friend systems
- Matchmaking services
- AI-generated drawings
- AI-powered guessing
- Payment processing
- Advertisements
- Mobile applications
- Social media integration
- Analytics dashboards
- Premium artwork
- Production-scale hosting infrastructure

The goal of this project is to create a functional multiplayer drawing-and-guessing game prototype rather than a production-ready commercial game.

11. Final Goal

The final result should be a playable browser-based multiplayer drawing game where players can create or join rooms, draw words, submit guesses, earn points, and compete through multiple rounds using a responsive and visually consistent interface.
